

## UNIT 2

1. What is system analyzed?
2. Explain black box approach.
3. Explain Decision Process approach.
4. What does state of system tell?
5. Explain component integration.
6. Explain origin of system analyze concept.
7. Explain need for modelling.
8. What is mathematical modelling?
9. "Model building is the essence of system design" Explain.
10. Discuss different type of models.
