

THE 2017

HILTI IoT COMPETITION

The Competition:

Students and graduates from all over the world join the competition to both prove themselves and to kick-start their careers. If you are interested in the topic of Internet of Things, this year's competition is for you.

Competition Topics:

Hilti aims to provide a user-centric experience through innovation and creativity in designing and developing tailor-made IoT prototype solutions that will enhance the digital experience of Hilti employees and customers. Please choose the challenge that best fits your interests and skills.

Topic 1: Digitalization of Customer Interaction

Topic 2: Implementation of IoT in Construction Industry

Submission:

Finalists selected from all submissions will be invited to an on-site workshop and award ceremony at Hilti Asia IT Services Sdn. Bhd., in Kuala Lumpur, Malaysia. Please download the call for submission for complete details on the competition, topics and conditions of participation.
